

ILUGBARO OLAOLUWA OLUSOLA

Software Engineer | Computer Science Student

olaoluwaolusola1206@gmail.com | +234 7048 782 107 | Ibadan, Nigeria | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

400-level Computer Science student at the University of Ibadan with a strong foundation in building robust web applications and complex logic systems. Passionate about clean code, scalable architecture, and bridging the gap between frontend interfaces and backend infrastructure. Adept at manual algorithm implementation, state management, and modern JavaScript/React ecosystems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Node.js (Learning) **Frameworks & Libraries:** React.js, Vite, Tailwind CSS

Architecture & Concepts: Clean Code, REST API Integration, Algorithm Design, Manual State Management **Tools:** Git, GitHub, npm, UI/Manual Testing

SELECTED PROJECTS

Vanilla JavaScript Chess Engine | *HTML, CSS, Vanilla JS (ES Modules)*

- Engineered a fully featured browser-based chess game from scratch without external libraries, implementing strict move-validation logic for all piece types.
- Designed a move-generation system split into pseudo-legal parsing and filtered-legal execution, simulating moves on a cloned board state to enforce king safety, check, and checkmate detection.
- Built a custom UI using CSS Grid and glassmorphism with live turn indicators, legal-move hints, and dynamic DOM updates.

HLR Network Simulator | *React.js, Vite, Tailwind CSS*

- Developed a GSM network simulation dashboard as part of an enterprise SIWES project for Airtel Nigeria (Huawei Project).
- Engineered simulated backend logic for GSM challenge-response authentication and Call Detail Record (CDR) billing.
- Designed a dark NOC-style visual interface to represent high-contrast, data-dense enterprise monitoring environments.

Scoot – Multi-Page Application | *React.js, Tailwind CSS*

- Architected a responsive multi-page web application translating complex Figma designs into a polished, component-driven UI.
- Managed dynamic SVG asset positioning and absolute layouts across desktop, tablet, and mobile breakpoints.

Chronos URL Shortener | *React.js, Vite*

- Built a streamlined frontend for a URL shortener with clean component hierarchies structured to consume REST API endpoints.
- Implemented custom UX feedback: conditional shake-on-error animations and copy-to-clipboard functionality.

WORK EXPERIENCE

IT Intern (SIWES) | Huawei / Airtel Nigeria

Jan 2026 – Apr 2026

- Completed intensive industrial training on GSM network infrastructure, telecommunications protocols, and enterprise IT operations.
- Independently built and presented the HLR Network Simulator to internship supervisors, demonstrating core GSM authentication and data flow concepts.

IT Intern (SIWES) | SQI College of ICT

2025

- Provided technical support including network troubleshooting, system maintenance, and software updates for community center hardware.

EDUCATION

B.Sc. Computer Science (Ongoing) | University of Ibadan | 400 Level

Ibadan, Nigeria
