ILUGBARO OLAOLUWA OLUSOLA

Frontend Engineer

olaoluwaolusola1206@gmail.com | +234 7048 782 107 | Ibadan, Nigeria | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Frontend Engineer building responsive, component-driven web applications with React, TypeScript, and Next.js. Experienced in translating designs into accessible interfaces, integrating RESTful APIs, and shipping to Vercel. Currently completing a B.Sc. in Computer Science at the University of Ibadan.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, Java, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Vite, Tailwind CSS, shadcn/ui, Zustand, TanStack React Query, React Hook Form, Framer Motion, GSAP

Concepts: Component-Based Architecture, Server-Side Rendering, Responsive Design, RESTful API Integration, State Management, Client-Side Routing, Authentication & Authorization

Tools: Git, GitHub, npm, Figma, ESLint, Prettier, Jest

PROJECTS

Dyna-learn | React, Vite, Tailwind CSS, ReactFlow dyna-learn.vercel.app

- Built an interactive AI tutor that renders a live concept graph on a ReactFlow canvas, with dagre auto-layout and custom node components
- Applied typed model responses as canvas actions (add, update, highlight nodes; generate quizzes), preserving user node positions instead of re-laying out the graph
- Managed hybrid text-to-speech across an audio player and the Web Speech API fallback, plus sessionStorage persistence, shareable lesson URLs, and SM-2 spaced repetition

Chrona | Next.js, TypeScript, Tailwind CSS chrona-xi-seven.vercel.app

- Built the frontend for an e-commerce platform using Next.js App Router with React Server Components
- Implemented state management with Zustand, internationalization support, and a component library with shadcn/ui

ShipSmart | Next.js, TypeScript, Tailwind CSS shipsmart-seven.vercel.app

- Developed a shipment tracking dashboard with real-time data fetching via TanStack React Query
- Implemented form validation with React Hook Form and Zod, domain-driven architecture, and animated page transitions

Chess Engine | Vanilla JavaScript mephisto126.github.io/Chess

- Engineered a browser-based chess game from scratch with full move-validation and rule enforcement
- Designed a pseudo-legal and filtered-legal move-generation system enforcing king safety, check, and checkmate detection
- Built a custom UI using CSS Grid with live turn indicators, legal-move hints, and dynamic DOM updates

WORK EXPERIENCE

IT Intern (SIWES) | Huawei / Airtel Nigeria Jan 2026 -- Apr 2026

- Built and presented the HLR Network Simulator to internship supervisors, demonstrating GSM subscriber authentication and call/data flow across core network elements
- Trained on GSM network infrastructure, signalling protocols, and fault identification in a live telecom enterprise environment

EDUCATION

B.Sc. Computer Science (Ongoing) | University of Ibadan | 400 Level | Expected Sept 2027

RELEVANT COURSEWORK

Database Systems, Data Structures, Introduction to Algorithms, Systems Programming, Computer Architecture and Organization, Computer Operating System I, Principles of Data Communication, Software Engineering, Systems Analysis
